# STARTUP EDUCATION

---

Our mission is to strengthen the under-served society in Israel's periphery, by creating a groundbreaking enriched and efficient educational system, through access to an educational experience comparable to that available to the wealthier communities.

The Darca network's educational vision states that every child in Israel's school system has the right to realize his potential for excellence regardless of his place of residence, parents' education, or any other environmental factor.

Darca is anchoring further and better humanistic-Jewish-democratic values, tolerance and active participation in national and community life.

The Darca network serves all sectors of the Israeli population; operating and managing 30 schools and learning centers nationwide.

Darca's unique methods offer its pedagogic staff continuous innovated training programs, ensuring high learning levels in Math, Science, English, Judaism, Civics etc.
