

# DARCA'S APPROACH TO FUNDING THE PERIPHERY

- Darca is the only network of schools that focuses exclusively on the peripheral communities.
- Darca manages a budget of over \$100,000,000 per year, from government and private funding.
- The Ministry of Education provides \$5,000 per student per year, which Darca effectively manages so that every penny is being allocated to the students.
- In addition to leveling the playing field from a funding standpoint, Darca instills professional management and brings innovative educational programs to advance the quality of education in Israel.
